

Gregory P. Geba, MD '15PH

Greg is a physician researcher, who is currently Senior Vice President at Regeneron and Adjunct Associate Professor at Mailman in the Department of Environmental Health Sciences. He completed an undergraduate degree at Brown, medical degree at the University of Navarre, MPH at Johns Hopkins and has a DrPH, focused on molecular toxicology from Columbia's Mailman School of Public Health. After training in Internal Medicine in Manhattan, he completed fellowship training in Immunology, Pulmonary and Critical Care Medicine at Yale, where, as a faculty member and Boyer Center Faculty Scholar in Molecular Medicine, he conducted research in immunological and molecular mechanisms underlying allergic and pulmonary diseases, directed the Medical Intensive Care Unit and served as an attending physician focused on asthma and immunological diseases of the lung.

He has spent the last twenty years in the biopharmaceutical sector contributing to the development of over 50 new therapies for the treatment of infectious diseases, allergic, autoimmune and inflammatory diseases, cardiovascular diseases and cancer. He lives in New Jersey with his wife Pilar, a pharmacologist. They have three children all in various stages of completing their own academic journeys. He is thrilled to join such an experienced, talented and committed Board to help Mailman continue to engage its Alumni and contribute ideas to chart the next 100 years of Columbia's public health mission.
