Health professionals are on the front lines of the climate crisis, and we must rapidly adapt our practice to mitigate impacts on our patients and communities. Join us for a 90 minute interdisciplinary panel which explores how to apply findings of the Lancet U.S. Policy Brief to multiple fields of health practice.

SPEAKERS

Alice Gahbauer, Pharm.D
Assistant Professor of Pharmacy Practice, University of Charleston School of Pharmacy

Bethany Carlos, MD, MPH
Community Pediatrician, Children’s National Medical Center

Sara Wohlford, MPH, RN
Efficiency and Sustainability Program Manager, Carilion Clinic in Roanoke, Virginia

Theopia Jackson, PhD
Chair, Saybrook University Clinical Psychology Degree Program

An opening presentation will be given by Renee N. Salas MD, MPH, MS and the session will be moderated by Heidi Honegger Rogers DNP, FNP-C, APHN-BC.

Session Objectives:

- Empower health professionals into place of climate action and advocacy in their respective fields
- Increase participant understanding of how different health professions can act individually and collaborate across disciplines
- Enable participants to effectively communicate about climate change personally and professionally
